
Dear Friends at Numatic,

Access to clean water is now a reality for hundreds of people in Nepal, thanks to you! On behalf of everyone at charity: water, thank you for your Water Project Sponsorship.

100% of your generous donation funded 75 piped system tap stands bringing clean water to 596 people!

As you look through the following pages and a selection of photos, I'd love to invite you to pause and picture all of the men, women, and children who finally have access to clean water. Some people have waited their entire lives for this moment, and your generosity helped make it possible.

I also want to recognize our local partner, Helvetas Nepal, who implemented a water system in Surkhet District that includes individual taps for all 313 households in Ms. Chandra Kumari Khadka's community. This new infrastructure has sparked "remarkable change," she says. In addition to being a mother of two, Ms. Chandra fulfills an important and highly respected role in her community: Female Community Health Volunteer (FCHV). These blue-saree-wearing wellness advocates are the primary source of information about public health and hygiene — and they also have their finger on the pulse of the overall health of their community. Ms. Chandra says diarrhea from waterborne illness, once a significant health concern among her neighbors, is now "almost nonexistent."

As a Director of Programs at charity: water, I am honored to oversee our partnerships, implementation strategies, and commitments in Nepal. I am equally honored to have a front-row seat to the life-changing impact of generosity like yours. Your kindness is rewriting stories for communities like Ms. Chandra's, and I can't say thank you enough.

Sincerely,

Michelle Jackson-Riewer
Director of Programs, charity: water

P.S. In November 2023, a powerful earthquake hit the Jajarkot District of western Nepal — one of Helvetas Nepal's working areas. While most systems continued to function, landslides and pipeline damage temporarily disrupted some service. Maintenance was quickly completed to restore water supply.
